

Message: I would like to draw the council's attention to the large and unsightly shed that has been erected by the owner of Poem 25 . The shed totally obliterates the view of the harbour from the pavement and while not a fence appears to contravene the local community plan (page 58 where it refers to the negative impact of houseboat paraphernalia to both the view and the environment). The height of the shed is also excessive and may contravene planning regulations.

Attached at bottom of email are photos of shed. The fence at it's lowest point is one metre, taking a picture of the length of the Shen and the impact on the view was rather dangerous given the road speed etc. in addition to the aesthetics issues the shed now creates a blind spot for cars and pedestrians on what is a dangerous corner on a fast road
